

CLOUDS:

Square lego bricks (slight beveled edge to show join)

Lego brick viewed at 30degrees off centre, so we have a bottom edge to it.

For the edge of the 'clouds' pieces we can have them 'unbalanced' looking by rocking slightly to suggest they are loose, as they will be the next to fall away.

## **BRICKS FALL DOWN TO EARTH!**

and are then used in the game.

You get more bricks as you clear more areas!

Odd shaped bricks, need to be cleared on a complete side before they will fall to earth.

Some unique shapes rest on top of the lego clouds, and the blocks holding it will all have to drop before it will fall down to earth.
